JEAN NOUVEL

An insatiable gusto for creative experimentation drives the work of Jean Nouvel. Born in France in 1945, Nouvel combines an artistic sensibility with theoretical concepts when considering issues of design.

Known for approaching architecture as a sculptor, he infuses native cultural elements within his designs for the built environment.

In 2008, Nouvel was awarded The Pritzker Architectural Prize.

ACCENT

Equilibrant minimalistic shape compliments any interior space, with a touch of modernism and elegance.

INTERACTIVITY

Winner of the 2015 Wallpaper Design Awards, Equilibrist looks like a high-tech traffic light whose signals emit non-symmetrical light. The combination of the arm balancing on the stem as well as the full vertical and horizontal rotation feature of the two lighting heads, allows for the user to achieve an endless number of configurations. The independent operation of the two on-off dimmer switches located on the two heads invites user interaction to meet all lighting needs.

EQUILIBRIST table

EMISSION

adjustable direct and diffused

LIGHT SOURCE

LED

4W + 8W 3000K >80CRI

DIMMING FEATURE

each head has its own independently operated dimmer switch
