

COPENHAGUE / CPH 30 EXTENDABLE

DESIGN BY RONAN & ERWAN BOUROULLEC

Part of the Copenhagen range designed by Ronan and Erwan Bouroullec, the CPH 30 Extendable shares the same characteristic angled legs and strong identity that are consistent with the rest of the collection, yet its extendable design sets it apart. Supplementary extension leaves can easily be inserted into the table's central sliding mechanism, allowing the table to be extended to the required length. The table's flexible length makes it suitable for offices and public contexts, as well as workspace or dining solutions in home environments. CPH 30 Extendable is available in a number of sizes with an oak frame in different finishes, and the tabletop comes in a variety of wood, laminate or linoleum options. The extension leaves can be purchased separately.

CONSTRUCTION

The tabletop has a pre-mounted aluminum slide mechanism with lock and solid oak wood crossbars. It rests upon two sets of angled solid oak wood legs, which needs to be mounted to the tabletop. The tabletop has threaded inserts for easy attachment and disassembly with machine screws.

A supporting leg is available in black painted solid beech wood, which is required when having three or four extension leaves. The leg is inserted into a steel keyhole bracket on the slide mechanism.

We recommend that the crossbar matches the table frame finish. For tables with oak veneer tabletop we recommend leaves with black linoleum top and crossbar as the frame finish.

Separate support leg in black painted solid beech RAL 9011. To be used when having 3 or 4 leaves.

TEST

Will be tested.

NOTE

The extension leaves must be stored at normal room temperature, and the tabletops should not lie against each other or any other flat surfaces to give them adequate "air" during storage.
